

Door Entry

Door Answering

Door Unlocking

Valcom's door entry system enables you to have extra security you need for your organization. With a push of a button your visitor initiates a two-way communication from the doorplate intercom to the telephone by simply pushing a button. Once the visitor is identified, you are able to dial a code on the phone to unlock the door. The door entry system is ideal for businesses, schools, correctional facilities or anywhere you need to control access to your facility.

Features & Advantages

Built-In Talkback Amplifier

Gives you two-way communication to identify your visitors.

Transmit & Receive Volume Control

Ensure both parties can hear a conversation.

Internal Power Supply

Easily plug into an A/C outlet.
